Dear Sir,

**Company Update**

Pursuant to regulation 30(2) of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, please find enclosed a press release issued by Moody’s Investors Service.

This is for your reference and records.

Yours faithfully,

Shanthi Venkatesan
Deputy General Manager

Encl: as above
Singapore, July 24, 2017 -- Moody's Investors Service has affirmed the local currency and foreign currency bank deposit ratings of Axis Bank Ltd and ICICI Bank Limited at Baa3/P-3, respectively.

At the same time, Moody's has downgraded the baseline credit assessments (BCAs) and adjusted BCAs of Axis and ICICI to ba1 from baa3.

Furthermore, Moody's has downgraded the Counterparty Risk Assessments (CR Assessments) of both Axis and ICICI to Baa3(cr)/P-3(cr) from Baa2(cr)/P-2(cr).

The foreign currency senior unsecured debt ratings, as well as the foreign currency senior unsecured medium-term note (MTN) program ratings for ICICI's branches, Axis Bank Limited, DIFC Branch and Axis Bank Limited, Hong Kong Branch have been affirmed at Baa3 and (P)Baa3 respectively.

The outlooks on all ratings, where applicable, have been revised to stable from positive.

A full list of the affected ratings is provided at the end of this press release.

RATING RATIONALE

DOWNGRADe OF BCA DRIVEN BY AN INCREASE IN NON-PERFORMING LOANS (NPL)

The downgrade of ICICI and Axis' BCA is primarily driven by an increase in NPLs over the last year. ICICI's reported gross non-performing loan (NPL) ratio increased to 7.9% at end March 2017 from 5.2% at end-March 2016, while that of Axis increased to 5.0% from 1.7% over the same period.

Although both banks have had relatively high exposures to large corporates with weak credit metrics, the recent increase in NPLs has exceeded Moody's expectations. In early 2016, both banks publicly disclosed a list of loan accounts with weak credit metrics, but that were not yet classified as NPLs. Although this disclosure signaled a deterioration in asset quality, the slippage from this list to NPLs was higher than expected, in addition to meaningful slippages from outside these exposures.

Moody's expects the pace of NPL formation to decline materially from the very high levels seen in the year ending March 2017, but to remain elevated. Both banks remain exposed to weak corporates that have not yet been classified as NPLs, thus representing a potential source of asset quality stress.

Moody's assessment of ICICI's asset quality also factors in the decline in low loan loss coverage ratio to 40% at end-March 2017 from 51% in the year ending March 2016 and 59% in the year ending March 2015.

At the same time, the banks' BCAs factor in their strong core profitability, with pre-provision income (PPI)/average total assets at 3.3% and 3.0% for ICICI and Axis, respectively, in the year ending March 2017. This high level of profitability, in part driven by their strong retail franchises, provides these banks with the ability to absorb a high level of credit costs and should allow them to gradually build up their loan loss buffers over the next two years.

ICICI's BCA also benefits from its very strong capital levels, with a reported CET1 ratio of 13.7% at end-March 2017. In addition, the bank has significant unrealized gains on its 55% stake in ICICI Prudential Life Insurance and its 63% in ICICI Lombard General Insurance. Although Moody's expects the bank will retain its majority stakes in these strategic subsidiaries, the shareholdings provide a potential source of capital should there be a scenario of acute solvency stress.

SUPPORTED RATINGS AFFIRMED AS THEY BENEFIT FROM ONE NOTCH OF SYSTEMIC SUPPORT

ICICI and Axis had a 4.5% and 3.8% share of system deposits at end-March 2017 respectively. At this size, and given the corresponding systemic importance, Moody's expects a 'high' level of support from the Indian
government (Baa3 positive) for these banks in case of need. The ‘high’ level of support also differentiates private sector banks from rated Indian public sector banks, which are in the ‘very high’ support bucket. The differentiation reflects the government’s shareholding in public sector banks and the systemic importance of the entire public sector banks sector, which represents over 70% of banking system assets.

The support assumptions for Axis and ICICI lead to a one-notch uplift from their BCAs, placing the supported rating at Baa3. At the same time, the change in outlook to stable from positive reflects Moody’s expectation that the supported ratings will no longer be upgraded if India’s sovereign rating is upgraded.

ICICI BANK LIMITED

WHAT COULD CHANGE THE RATINGS -- UP
ICICI's deposit ratings could be upgraded if both the bank's BCA and the Indian sovereign rating are upgraded.

WHAT COULD CHANGE THE RATINGS -- DOWN
Downward pressure on ICICI's BCA could develop if: (1) its NPL ratio deteriorates significantly from the current level; or (2) a decline in earnings leads to a significant decrease in internal capital generation.

The deposit ratings could be downgraded if India's sovereign rating is downgraded

AXIS BANK LTD

WHAT COULD CHANGE THE RATINGS -- UP
AXIS's deposit ratings could be upgraded if both the bank's BCA and the Indian sovereign rating are upgraded.

WHAT COULD CHANGE THE RATINGS -- DOWN
Downward pressure on Axis's BCA could develop if: (1) its NPL ratio deteriorates significantly from current levels; (2) a decline in earnings leads to a significant decrease in internal capital generation; or (iii) there is material weakening of its capital from current levels.

The deposit ratings could be downgraded if India's sovereign rating is downgraded
