News Release

ICICI Bank Limited (NYSE: IBN) filed its annual report in Form 20-F for the year ended March 31, 2019 (FY2019) on July 31, 2019, as required by United States securities regulations. The Form 20-F annual report includes the Bank’s consolidated financial statements under Indian GAAP and a reconciliation of consolidated profit after tax and net worth under Indian GAAP to net income and stockholders’ equity under U.S. GAAP, approved by the Audit Committee of the Board.

The net income for FY2019 under U.S. GAAP was Rs. 9,495 crore (US$ 1,373 million) as compared to consolidated profit after tax under Indian GAAP of Rs. 4,254 crore (US$ 615 million). The significant difference between net income under U.S. GAAP and Indian GAAP was primarily due to difference in allowance for loan losses and accounting for loans where the Bank had invoked/implemented strategic debt restructuring (SDR).

Under U.S. GAAP, the allowance for loan losses in the income statement was lower by Rs. 6,504 crore (US$ 940 million) in FY2019 as compared to Indian GAAP. The differences in the methodology of computing loan loss allowances between Indian GAAP and U.S. GAAP result in timing differences in the recognition of allowance for loan losses. Under U.S. GAAP, the provision on impaired loans in FY2019 was lower than the provision under Indian GAAP, as the Bank had made higher provision on impaired loans under U.S. GAAP as compared to Indian GAAP in earlier years. Further, for a few cases, the provision requirement under U.S. GAAP was lower than Indian GAAP due to differences in methodology where the provision on non-performing loans under Indian GAAP is primarily based on the number of days a loan is past-due, whereas under U.S. GAAP, the provision is primarily based on assessment of recovery from impaired loans. There was a gain of Rs. 1,382 crore (US$ 200 million) under U.S. GAAP in FY2019 on fair value accounting of loans where the Bank had invoked/implemented SDR. In FY2019, the income tax expense was higher by Rs. 3,496 crore (US$ 505 million) under U.S. GAAP as compared to Indian GAAP primarily due to income tax impact of accounting for other differences between U.S. GAAP and Indian GAAP.
Stockholders’ equity as per U.S. GAAP was Rs. 131,530 crore (US$ 19.0 billion) at March 31, 2019 compared to the consolidated net worth as per Indian GAAP of Rs. 114,253 crore (US$ 16.5 billion).

Pursuant to its issuance and listing of securities in the United States under registration statements filed with the Securities and Exchange Commission, ICICI Bank files annual report in Form 20-F with the SEC as required by U.S. securities laws and regulations. ICICI Bank in its annual report in Form 20-F includes consolidated financial statements under Indian GAAP, with a reconciliation of profit after tax and net worth under Indian GAAP to net income and stockholders’ equity under U.S. GAAP and a description of significant differences between Indian GAAP and U.S. GAAP.

It may be noted that there are significant differences in the basis of accounting between U.S. GAAP and Indian GAAP primarily relating to allowance for loan losses, business combinations, consolidation, valuation of securities and derivatives, amortization of fees and costs, compensation costs, securitization, income taxes and fixed assets.

Copies of the Form 20-F are available from the United States Securities and Exchange Commission (SEC) website www.sec.gov or via a direct link to the SEC website at "About Us/Investor Relations/SEC Filings" page of ICICI Bank’s website:
